† Prices are per share, not per cent. ‡ Sale price. x Ex-dividend.

QUOTATIONS OF BANK AND TRUST COMPANY STOCKS.

Prices are per share, not per cent, with the exception of New York City, Brooklyn and Canadian bank stocks.
Prices marked thus (*) indicate sales.
The dagger (†) prefixed to a price indicates that the figures show the book value.

☞ **Notice Change.**—We now report surplus and undivided profits together (in the column designated Surplus and Profits) except where otherwise indicated.

Where names of the banks are printed in italics, fuller returns may be found in the advertising columns in the front part of the paper.

REVIEW OF AUGUST.

The tone of the financial markets improved considerably during August, notwithstanding that the developments were not altogether favorable. The strike of the steel workers continued throughout the month, though during the latter half there were multiplying evidences of its early collapse. The monthly report of the Agricultural Bureau at Washington, issued as usual on the 10th of the month, represented the condition of the corn crop as a great deal worse than any one had expected, and this served as a temporary depressing influence; but here too the prospects changed materially for the better as the month advanced. The money market moved smoothly with rates remaining low. Still there were indications that it might work closer in the near future.

The Bureau report showed the condition of the crops for only the 1st of the month. It made the average of corn for the whole country no more than 54, being a decline of 27·3 points during July. All advices had pointed to great damage in Kansas and Missouri, the crops over large portions of those States being little short of an utter failure, so the public was prepared for condition figures of but 19 for Kansas and 29 for Missouri; but it was a decided surprise to have the Bureau report the condition of Nebraska but little better at 36, and to find Illinois placed no higher than 51, with Iowa and Indiana both 57, and Tennessee 57 and Kentucky 53—indicating very considerable damage in the corn belt of the Central West.

The Bureau report was accepted as pointing to a corn crop of only 1,400 million bushels, as against 2,105 million bushels in 1900. Simultaneously, some of the newspapers printed elaborate private reports purporting to show further severe damage the first ten days of August. One of these estimates declared that the prospective yield had been cut down to 1,100 million bushels. The effect on the price of corn was noteworthy, a striking advance occurring on Monday the 12th, the September option in this market touching 64 cents. It appeared that while the rains the latter part of July had furnished full relief west of the Mississippi, the drought had not been broken in the territory east of the Mississippi. There was hence a basis for the reports of further damage in parts of the latter section the first half of the month. As an offset, however, considerable improvement in prospects occurred west of the Mississippi, even Kansas and Missouri saying that many apparently dead fields had revived. About the middle of the month the needed rain came in the

Middle West, and thereafter the advices were quite generally encouraging, a feature being the favorable accounts received concerning late-planted corn, which constituted a larger percentage of the crop than usual. The September option for corn in New York reacted to 59 cents August 27, the close August 30 (Saturday) being at 60¾ cents; the low point for the month was 58¾ August 1.

In the steel strike the month opened with the terms of settlement agreed upon by Mr. J. P. Morgan and President Shaffer, of the Amalgamated Association, apparently still under discussion by the Executive Board of the Association. On Saturday the 3d the Executive Board came to New York in a body to confer with Mr. Morgan and President Schwab and other officials of the United States Steel Corporation. The conference proved fruitless, and on Tuesday the 6th President Shaffer issued an order extending the strike to the other constituent companies of the United States Steel Corporation on which the Amalgamated Association had a hold, namely the National Steel Co., the National Tube Co. and the Federal Steel Co. The order was to go into effect after the last turn of the mills on August 10. The result of this move was a decided surprise to the labor leaders; meetings of the men ordered out were held at the mills of the Federal Steel Co. at South Chicago, at the mills at Joliet and at the Bay View plant at Milwaukee, and in each case the conclusion was reached that, contracts having previously been made between the men and the companies, the men would not violate these contracts, and hence that the order to strike would not be obeyed. On the 15th the men at the Joliet mills were induced to re-consider their decision, and went out. The Bay View men subsequently took the same course, but the South Chicago men remained firm in their first determination, and President Shaffer ordered their charter in the Amalgamated Association forfeited. The Amalgamated men at some of the mills of the other companies also quit work. But no trouble was experienced by the Carnegie Company in running all its various plants, these being non-union, and the non-union mills of the other companies were also kept running. Moreover, considerable progress attended the efforts to start up idle mills from week to week. Altogether, the United States Steel Corporation managed to turn out a considerable proportion of its normal product.

An important event of the month was the dissolution of the Fall River Selling Committee appointed in October 1898 by the manufacturers of print cloths for the purpose of regulating production and prices. The break-up was the result of friction among some of the mills. After the committee went to pieces a movement developed for a reduction in wages, and there was talk of a strike of the employes as a consequence. The movement was actively opposed by M. C. D. Borden, and finally the proposed reduction was abandoned. Mr. Borden, as on several previous occasions, came to the relief of the market. On the 22d he offered to buy the whole stock of print cloths of regular size at 2½ cents per yard, an advance of 1-16 cent. He is understood to have succeeded in obtaining only 200,000 pieces, when the price rose to 2 9-16 cents. Subsequently there was a further advance to 2⅝ cents, and the tone of the market was considerably improved. The upward movement was probably induced by the rise in the price of the raw material caused by continued drought in Texas; middling upland cotton in this market was quoted at 8⅝ cents August 31, against 8 cents earlier in the month.

Money rates ruled easy, but the position of the Clearing House banks was weakened by a continued drain of money into the U. S. Treasury and by an active demand the latter part of the month from the interior, this last being supplemented by some large shipments to Philadelphia in connection with the negotiation of a new loan for the city of Philadelphia and the financing of the Bethlehem Steel deal. The Secretary of the Treasury gave authority to the Assistant Treasurer at New York to make purchases of U. S. bonds direct, instead of through the Department at Washington, without, however, operating to increase the offerings. Surplus reserves were reduced from $23,128,575 July 27 to $11,919,925 August 31.

Foreign exchange was strong the early part of the month and rates advanced. There was then talk of possible gold exports. About the middle of the month, however, the course of the market was reversed and rates sharply declined. This encouraged a belief in early gold imports.

On the Stock Exchange there was a quite general recovery in prices. The volume of business was small but the tone very firm. The disposition was to take a more favorable view of the prospects for corn, and to regard the failure of the steel strike as a foregone conclusion.

NEW YORK STOCK EXCHANGE.

MONTHLY AND YEARLY RECORD.

The following tables furnish a complete record of the New York Stock Exchange transactions for the past month and the year 1900. They need no extended introduction, as they are self-explanatory. The tables embrace every security (excepting only State bonds) dealt in on the Exchange. We give bonds first, using the classification adopted in the official list. As to prices the form is our own, and we think it will be found to contain just the facts desired by our readers and to present them in the most convenient way for study and reference. All quotations in the column headed "*Prices about January 2, 1901*," were made on that date except those in italics, which are the nearest in January, 1901. The black-faced letters in the column headed "Interest Period" indicate in each case the month when the bonds mature.

☞ *For foot notes to tables see last page of Bonds and last page of Stocks.*

Boston Stock Exchange.

MONTHLY AND YEARLY RECORD.

The railroad securities which are active on the New York Stock Exchange are omitted from this list.

☞ *In comparing New York and Boston prices, it should be noted that bond prices in New York are flat prices—that is, the price includes the accrued interest, while in Boston accrued interest must be paid in addition to price. It should also be remembered that New York stock prices are per cent while those in Boston are dollars per share.*

GENERAL QUOTATIONS

—OF—

BONDS AND STOCKS.

1. In the following twenty-seven pages of tables quotations are given for all securities listed on any Stock Exchange in the United States; also for all leading unlisted and inactive securities for which we have been able to obtain reliable prices.

2. Quotations from all Stock Exchanges are as near as possible for the *last day of August*. Of course the coupon, if there be one, maturing between the date of quotation and the date of this publication, is not deducted from the price.

3. Bond prices marked thus (§) indicate that the purchaser must pay accrued interest *in addition to the price given* The method of quoting on the New York Stock Exchange is to quote the prices flat (that is to include the accrued interest in the price), and hence in the tables below no mark is now affixed where this method of quoting is followed.

4. Stock prices marked thus (†) are per share. All others are per cent except bank stock prices.

5. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.

6. The following abbreviations are often used, viz.; "M.," for mortgage; "g.," for gold; "g'd.," for guaranteed; "end.," for endorsed; "cons.," for consolidated; "conv.," for convertible; "s. f.," for sinking fund; "l. g.," for land grant.

7. The black-faced type in the letters showing the interest periods indicates in each case the *month* when the bonds mature.

☞ We no longer affix a mark to prices quoted flat, but only to those which require payment of accrued interest in addition to the price. Designating mark in this instance is (§).

† Prices per share not per cent. x Ex-dividend. ‡ Sale price.

STATE AND MUNICIPAL BONDS.

Prices marked (*) are flat prices—that is, the purchaser does not pay accrued interest in addition. *In all other cases accrued interest must be added to the price.*

The figures in the column "*to net*" indicate the basis on which the securities sell or the interest rate which the securities if held to maturity, will net to the purchaser at the present market price.

It should be borne in mind that municipal bonds are not subject to such decided fluctuations in value as are securities which form a basis for speculation.

QUOTATIONS OF BANK AND TRUST COMPANY STOCKS.

Prices are per share, not per cent, with the exception of New York City, Brooklyn and Canadian bank stocks.
Prices marked thus (*) indicate sales.
The dagger (†) prefixed to a price indicates that the figures show the book value.
☞ **Notice Change.**—We now report surplus and undivided profits together (in the column designated Surplus and Profits) except where otherwise indicated.
Where names of the banks are printed in italics, fuller returns may be found in the advertising columns in the front part of the paper.

REVIEW OF SEPTEMBER.

The markets endured a number of severe shocks during September. Of course the event which overshadowed everything else was the shooting and subsequent death of President McKinley. This lamentable occurrence on the whole disturbed the course of affairs far less than might have been expected under the circumstances; but quite naturally the shock occasioned when the news of the attack was received was a severe one, as was also that caused a week later by the intelligence of the President's hopeless condition and his subsequent death. On the first occasion the results on the Exchange and in financial circles might have been serious except for the precautions taken by banking and financial interests to avert disaster or a panic.

The attack on the President occurred late in the afternoon of Friday the 6th. A meeting was convened the same night at an uptown hotel of such of the members of the Clearing House Committee as could be reached, and at this gathering the gravity of the situation was considered and the issue of Clearing House certificates, for a large amount if necessary, discussed. This action was followed by the meeting Saturday morning at 9 o'clock of the full Clearing House Committee, at which meeting also other leading bankers and financiers were present, among them Messrs. J. P. Morgan, James Stillman, James T. Woodward and George F. Baker. The decision come to was that banking and financial interests would stand together for the purpose of checking the development of panicky conditions. Apart from these collective measures, it became apparent before the opening of business on the Stock Exchange that a measure of support to values would be given by those chiefly interested in the more important properties. Nevertheless the stock market was greatly demoralized and a severe break in prices ensued, leading stocks dropping several points. The danger of a panic, however, had been successfully overcome. The bank statement issued before the close of the half-day's business proved a very bad one, surplus reserves being reduced by $5,004,050, to the low figure of $6,915,875. Coming at such a juncture, this had a decidedly unsettling effect, and the day closed with everybody still in an anxious frame of mind.

The following Monday the aspect of things had completely changed. The acccounts regarding the President's condition were favorable in the extreme, and all the indications seemed to point to his early recovery. In addition the Clearing House Committee,

recognizing that with bank reserves so low and with the U. S. Treasury continuing to absorb cash, the money market was a source of danger, held another meeting at which pledges of money were obtained to the amount of $30,000,000 to be loaned upon the Stock Exchange if necessary. All this aided in restoring confidence, and none of the money pledged was required. The stock market opened up several points and remained firm throughout the day. Monday afternoon further steps were taken to guard against possible money stringency. Mr. F. D. Tappen, as Chairman of the Clearing House Committee, sent a telegram to Secretary Gage directing his attention to the absorption of money by the Treasury and expressing the hope that a portion at least of the Government's surplus be returned to the channels of circulation. The Secretary responded the next day by inviting tenders of U. S. bonds up to the aggregate of $20,000,000. He also directed that bank depositaries be allowed to retain internal revenue receipts up to the par value of all the bonds held as security by the Treasury, instead of to only 95 per cent of the 2s and 3s and par on the 4s and 5s. After the close of business on Thursday (the 12th) he announced the acceptance of $7,546,300 of the bonds offered, calling with the premiums paid for a disbursement of not far from $10,000,000. The bonds were promptly presented the next day and $8,479,678 in cash was paid out over the counter at the Sub-Treasury in this city on account of the same. The advices concerning the President had continued highly encouraging, and so the stock market had kept improving day by day. By Thursday night nearly all traces of depression and anxiety had disappeared.

But Friday a second and still worse shock than that of the preceding Saturday was experienced. The President's condition was now reported as critical, if not hopeless. This was as unexpected as the previous news of the shooting. The sudden change led to another and even more violent break in prices than that at first experienced. The dispatches throughout the day continued exceedingly gloomy, and again, therefore, the market closed in a state of extreme tension. The worst happened that might—the President dying at 2:15 o'clock Saturday morning. Out of respect to his memory the Stock Exchange remained closed on Saturday, and dealings were also suspended on the London Stock Exchange.

By Monday all dread of the consequences that might attend the change of the nation's chief executive had passed away. In taking the oath of office Saturday afternoon (the 14th), President Roosevelt promptly declared it to be his purpose to continue absolutely unbroken the policy of Mr. McKinley, and he requested the members of the Cabinet to remain in office. As it happened, too, the announcement came the same day that the strike of the steel workers had been settled, it ending in a complete defeat for the Amalgamated Association. The stock market, therefore, instead of recording a further decline, opened at an advance of several points, and evinced growing strength throughout the day. President Roosevelt further emphasized his purpose to follow in Mr. McKinley's footsteps, and after the funeral obsequies at Washington on Tuesday (the 17th) he repeated his request to the members of the Cabinet that they all continue in office—a request to which they acceded. The Treasury at the same time continued to make liberal disbursements of cash. On Friday the 13th (on the night of which the President died) Mr. Gage had announced that he would resume the purchase of the U. S. bonds under the old plan, and in addition would entertain proposals for the purchase of the 4s of 1925 at 140 flat. He obtained quite a good many bonds of the latter class the rest of the month. On Monday the 16th he also directed the pre-payment of the interest due October 1, calling for $4,700,000, on the Government debt. Under these contributions and continued gold transfers from the Pacific Coast, the condition of the Clearing House banks steadily improved, notwithstanding very heavy shipments of currency to the interior—surplus reserves rising from $6,915,875 Sept. 7 to $7,110,550 Sept. 14, to $13,654,225 Sept. 21 and to $16,303,025 Sept. 28.

One other disturbing influence of the month deserves to be mentioned. Friday afternoon the 20th the directors of the Amalgamated Copper Co. declared a quarterly dividend of only 1¼ per cent, omitting the extra ½ per cent theretofore paid. As the action was understood to be due to the company's inability to market its accumulations of copper, the event proved very unsettling on the Stock Exchange, and for several days thereafter the whole list was weak and lower. The market, however, partly regained tone the latter part, under a very pronounced rise in the stocks classed as "junior Vanderbilts," particularly Nickel Plate shares and Lake Erie & Western. New York Central participated in the strength. The rumor, however, that arrangements were under way for the complete absorption or amalgamation of these properties remained wholly unconfirmed.

Good 4 to 6 months	6	5½-6	5½-6	5½-6

Foreign exchange steadily declined up to the 19th, leading to some engagements of gold (mainly in Paris) for shipment hither, but after that sharply advanced, checking further imports. The Bank of Germany raised its discount rate from 3½ to 4 per cent on the 24th.

NEW YORK STOCK EXCHANGE.

MONTHLY AND YEARLY RECORD.

The following tables furnish a complete record of the New York Stock Exchange transactions for the past month and the year 1900. They need no extended introduction, as they are self-explanatory. The tables embrace every security (excepting only State bonds) dealt in on the Exchange. We give bonds first, using the classification adopted in the official list. As to prices the form is our own, and we think it will be found to contain just the facts desired by our readers and to present them in the most convenient way for study and reference. All quotations in the column headed "*Prices about January 2, 1901*," were made on that date except those in italics, which are the nearest in January, 1901. The black-faced letters in the column headed "Interest Period" indicate in each case the month when the bonds mature.

☞ *For foot notes to tables see last page of Bonds and last page of Stocks.*

Boston Stock Exchange.

MONTHLY AND YEARLY RECORD.

The railroad securities which are active on the New York Stock Exchange are omitted from this list.

☞ *In comparing New York and Boston prices, it should be noted that bond prices in New York are flat prices—that is, the price includes the accrued interest, while in Boston accrued interest must be paid in addition to price. It should also be remembered that New York stock prices are per cent while those in Boston are dollars per share.*

GENERAL QUOTATIONS

—OF—

BONDS AND STOCKS.

1. In the following twenty-seven pages of tables quotations are given for all securities listed on any Stock Exchange in the United States; also for all leading unlisted and inactive securities for which we have been able to obtain reliable prices.

2. Quotations from all Stock Exchanges are as near as possible for the *last day of September*. Of course the coupon, if there be one, maturing between the date of quotation and the date of this publication, is not deducted from the price.

3. Bond prices marked thus (§) indicate that the purchaser must pay accrued interest *in addition to the price given* The method of quoting on the New York Stock Exchange is to quote the prices flat (that is to include the accrued interest in the price), and hence in the tables below no mark is now affixed where this method of quoting is followed.

4. Stock prices marked thus (†) are per share. All others are per cent except bank stock prices.

5. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.

6. The following abbreviations are often used, viz.; "M.," for mortgage; "g.," for gold; "g'd.," for guaranteed; "end.," for endorsed; "cons.," for consolidated; "conv.," for convertible; "s. f.," for sinking fund; "l. g.," for land grant.

7. The black-faced type in the letters showing the interest periods indicates in each case the *month* when the bonds mature.

☞We no longer affix a mark to prices quoted flat, but only to those which require payment of accrued interest in addition to the price. Designating mark in this instance is (§).

† Prices per share not per cent. x Ex-dividend. ‡ Sale price.

STATE AND MUNICIPAL BONDS.

Prices marked (*) are flat prices—that is, the purchaser does not pay accrued interest in addition. *In all other cases accrued interest must be added to the price.*

The figures in the column "*to net*" indicate the basis on which the securities sell or the interest rate which the securities if held to maturity, will net to the purchaser at the present market price.

It should be borne in mind that municipal bonds are not subject to such decided fluctuations in value as are securities which form a basis for speculation.

† Prices are per share, not per cent. ‡ Sale price. x Ex-dividend.

QUOTATIONS OF BANK AND TRUST COMPANY STOCKS.

Prices are per share, not per cent, with the exception of New York City, Brooklyn and Canadian bank stocks.
Prices marked thus (*) indicate sales.
The dagger (†) prefixed to a price indicates that the figures show the book value.
☞ **Notice Change.**—We now report surplus and undivided profits together (in the column designated Surplus and Profits) except where otherwise indicated.
Where names of the banks are printed in italics, fuller returns may be found in the advertising columns in the front part of the paper.

REVIEW OF OCTOBER.

Perhaps the two most conspicuous features during October were the distrust manifested in industrial securities on the Stock Exchange, leading to further sharp breaks in the prices of the same, and the anomalous state of our foreign exchange market. The distrust of the industrial securities grew out of the reduction the previous month in the dividend on Amalgamated Copper stock, with the attending revelations concerning the falling off in the consumption of copper, but was intensified by a number of other circumstances. Thus the annual reports of these companies for the year ending June 30 1901 proved decidedly unfavorable in a great many cases.

These poor reports did not come from concerns in any one branch of industry, but embraced a great variety of industries. As a result, confidence in this class of shares, not any too strong before, decreased more and more, and every untoward incident served further to increase the prevailing uneasiness. The collapse in the shares of the National Salt Co. will serve as an excellent illustration of the unsettled feeling created. The common stock of this company sold down on very light transactions from 40 Oct. 2 to 23 Oct. 3. The occasion for the shrinkage was the announcement of the terms of exchange of the securities into a new company, to be called the International Salt Company. In this instance there was nothing to show that the business of the concern was not satisfactory, but apparently the fact that the new company was to have a very much larger capital than the company to be absorbed made security holders and the public solicitous, and there was also some criticism of the methods of financiering employed. Another disturbing incident of the month was the upholding by the Court of Appeals of the order granted by Justice Chase in the case brought against the American Ice Company under the Donnelly Anti-Trust law. The significance of this decision appears to have been greatly exaggerated, but coming at such a juncture it constituted an additional depressing influence.

The decline in the industrial stocks did not extend to the railroad shares except in the case of the highly speculative classes. The Atchison increased the semi-annual dividend on its common stock from 1½ to 2 per cent, and railroad earnings continued remarkably good. The group of stocks involved in the Morgan-Hill, Harriman-Kuhn, Loeb & Co. imbroglio developed unusual activity, and on occasions showed great strength on rumors that the matters in dispute

would be satisfactorily adjusted. Northern Pacific preferred, in which, since the contest for control, transactions had been very infrequent, suddenly showed tremendous dealings and the price Oct. 18 rose to 108⅞; the close Oct. 31 was at 103¾. Nothing definite developed regarding the prospects for an amicable settlement of the differences, though the belief was general that the interests at stake were too great to make any other outcome possible. Milwaukee & St. Paul common advanced sharply, touching 171½ on the 26th, against 154¼ on the 7th, and it was hinted that that property was sought in the interest of one or the other of the parties to the contest. Later there was some reaction.

The Vanderbilt properties were also at times prominent in the market at rising prices. New York Central sold up from 154 on the 4th to 159⅝ on the 23d. Another feature was a rise in Lake Shore stock, of which a comparatively small amount remains outstanding, from 275 to 325 (the highest previous price having been 250) on sales of only a few shares. Big Four common advanced to 100¼ on the 30th and Michigan Central also had a sensational rise.

SALES OF GRAIN ON THE PRODUCE EXCHANGE.

	1901. *Bushels.*	1900. *Bushels.*	1899. *Bushels.*	1898. *Bushels.*
Month of October.....	76,754,700	109,536,050	59,083,600	83,640,000
January 1 to Oct. 31.....	708,532,825	931,214,730	713,290,480	864,285,607

A trade incident of the month was the action of M. C. D. Borden in announcing a further advance of 5 per cent in the wages of the operators at the mills of the Fall River Iron Works Co. after the announcement of a similar advance the month before. The motives underlying this move were not understood.

The course of foreign exchange has not been what might be looked for at a season of large merchandise exports such as distinguishes the autumn months. The tone of the market has been strong and rates of exchange have almost continuously advanced. While ordinarily gold imports are be counted as among the possibilities at this time of the year, an outflow of the metal actually occurred at the close of the month. The causes responsible for this peculiar situation are not all known or perfectly understood. A number of contributing circumstances however, are easily discernible. In the first place the European money markets have been decidedly firm. At Berlin the situation has been strained for a long time, owing to the depression prevailing in business and the collapse of industrial companies and the many bank failures. During the month just closed the Paris market also became disturbed. French investors appear to have sustained considerable losses through investments in foreign industrial enterprises—principally Russian; to this has now been added a great decline in copper stocks (which have always been favorites in the French markets) precipitated by the break here in Amalgamated Copper and the disclosures regarding the piling up of stocks of the metal.

One result of the disturbance in the French markets has been a sharp advance in the open market discount rate at Paris. On September 30 the rate for discounts was still 1½ per cent. From this there was an advance to 2⅞@3 per cent in October. The rise led to the fear that a part of the enormous amount of French money invested in trade and bank bills at London would be withdrawn from that market, and Paris exchange on London declined so as to make imports of gold from London profitable. At the same time Berlin also kept drawing gold from London. As a consequence of this double drain, open market discounts in London advanced from 2 3-16@2¼ per cent on September 30 to 3¼@3½ per cent October 31, and the Bank of England October 31 advanced its minimum from 3 to 4 per cent. The reduction in the gold holdings of the leading European banks was on a really noteworthy scale. Between September 26 and October 24 the holdings of the Bank of England dropped from £39,637,691 to £36,351,411, those of the Bank of France from £95,356,646 to £94,358,263, and those of the Bank of Germany from £31,073,000 to £26,462,000. This is a loss for the three institutions of £8,895,663, or $44,478,000. In the week to Oct. 31 the Bank of England lost £696,888 more, but the Bank of France gained £671,000, and the Bank of Germany gained £1,683,000.

The high money rates abroad necessarily had their effect upon our exchange market. There were also reports of a dearth of cotton bills the early part of the month, and the cotton movement then undoubtedly was on a restricted scale; but later this was rectified, the cotton exports then becoming free, though the price of the staple remained lower than a year ago. Owing to the corn crop failure and the high price to which the cereal has advanced, corn exports have been very restricted. As an offset, however, the shipments of wheat are on a large scale. As to the other influences affecting the market, it is contended that leading financial interests here have been extensive borrowers abroad since last spring, that these loans have been maturing, and that some of them have been paid off. It should likewise be noted that the latter part of the month it was reported that there was a demand to remit for the instalment due November 7 on American subscriptions to the £60,000,000 British consol. loan issued last April.

NEW YORK STOCK EXCHANGE.

MONTHLY AND YEARLY RECORD.

The following tables furnish a complete record of the New York Stock Exchange transactions for the past month and the year 1900. They need no extended introduction, as they are self-explanatory. The tables embrace every security (excepting only State bonds) dealt in on the Exchange. We give bonds first, using the classification adopted in the official list. As to prices the form is our own, and we think it will be found to contain just the facts desired by our readers and to present them in the most convenient way for study and reference. All quotations in the column headed "*Prices about January 2, 1901*," were made on that date except those in italics, which are the nearest in January, 1901. The black-faced letters in the column headed "Interest Period" indicate in each case the month when the bonds mature.

☞ *For foot notes to tables see last page of Bonds and last page of Stocks.*

Boston Stock Exchange.

MONTHLY AND YEARLY RECORD.

The railroad securities which are active on the New York Stock Exchange are omitted from this list.

☞ *In comparing New York and Boston prices, it should be noted that bond prices in New York are flat prices—that is, the price includes the accrued interest, while in Boston accrued interest must be paid in addition to price. It should also be remembered that New York stock prices are per cent while those in Boston are dollars per share.*

GENERAL QUOTATIONS

—OF—

BONDS AND STOCKS.

1. In the following twenty-seven pages of tables quotations are given for all securities listed on any Stock Exchange in the United States; also for all leading unlisted and inactive securities for which we have been able to obtain reliable prices.

2. Quotations from all Stock Exchanges are as near as possible for the *last day of October*. Of course the coupon, if there be one, maturing between the date of quotation and the date of this publication, is not deducted from the price.

3. Bond prices marked thus (§) indicate that the purchaser must pay accrued interest *in addition to the price given* The method of quoting on the New York Stock Exchange is to quote the prices flat (that is to include the accrued interest in the price), and hence in the tables below no mark is now affixed where this method of quoting is followed.

4. Stock prices marked thus (†) are per share. All others are per cent except bank stock prices.

5. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.

6. The following abbreviations are often used, viz.; "M.," for mortgage; "g.," for gold; "g'd.," for guaranteed; "end.," for endorsed; "cons.," for consolidated; "conv.," for convertible; "s. f.," for sinking fund; "l. g.," for land grant.

7. The black-faced type in the letters showing the interest periods indicates in each case the *month* when the bonds mature.

☞ We no longer affix a mark to prices quoted flat, but only to those which require payment of accrued interest in addition to the price. Designating mark in this instance is (§).

† Prices per share not per cent. x Ex-dividend. ‡ Sale price.

STATE AND MUNICIPAL BONDS.

Prices marked (*) are flat prices—that is, the purchaser does not pay accrued interest in addition. *In all other cases accrued interest must be added to the price.*

The figures in the column "*to net*" indicate the basis on which the securities sell or the interest rate which the securities if held to maturity, will net to the purchaser at the present market price.

It should be borne in mind that municipal bonds are not subject to such decided fluctuations in value as are securities which form a basis for speculation.

Bonds.	Bid.	Ask.	To Net.

† Prices are per share, not per cent. ‡ Sale price. x Ex-dividend.

QUOTATIONS OF BANK AND TRUST COMPANY STOCKS.

Prices are per share, not per cent, with the exception of New York City, Brooklyn and Canadian bank stocks.
Prices marked thus (*) indicate sales.
The dagger (†) prefixed to a price indicates that the figures show the book value.
☞ **Notice Change.**—We now report surplus and undivided profits together (in thecolu mn designated Surplus and Profits) except where otherwise indicated.
Where names of the banks are printed in italics, fuller returns may be found in the advertising columns in the front part of the paper.

REVIEW OF NOVEMBER.

Opposing influences and conditions held sway in financial circles and on the Stock Exchange during November. The settlement of the Northern Pacific embroglio between the Hill-Morgan interests on the one side and the Harriman-Kuhn, Loeb & Co. people on the other was of course a positive favoring factor of large importance. The features of the settlement were (1) the organization of the Northern Securities Company with $400,000,000 stock to take over the control (by exchange of stock) of the Great Northern and the Northern Pacific companies; (2) the purchase by the Hill-Morgan interests of the Harriman-Kuhn, Loeb & Co. holdings of Northern Pacific preferred stock; (3) the retirement of this preferred stock by an issue of Northern Pacific convertible bonds having the privilege of conversion into Northern Pacific common stock, and (4) the lease of the Chicago Burlington & Quincy RR. to a new company called the Chicago Burlington & Quincy *Railway* with representation in the latter to the Harriman-Kuhn, Loeb & Co. interests. As against this favorable development, however, the continued demoralization and further sharp break in Amalgamated Copper stock, and the large outflow of gold at a time of year when gold imports are usually looked for, had a more or less disturbing effect.

At the same time the action of Mr. M. C. D. Borden in dropping the wages of the operatives at the Fall River Iron Works Cotton Mills to the old figures, coming so quickly upon his previous action in making two successive advances of 5 per cent each, had a distinctly unsettling influence in the cotton goods trade. The trouble in this last instance was aggravated by Mr. Borden's further course in offering print cloths at a reduction of $\frac{1}{8}$ cent from the figure previously bid by him and in making severe cuts in the price of certain lines of staple prints. Print cloths were quoted at only 3 cents per yard at the close of the month, against sales at the beginning of the month at $3\frac{1}{8}$ cents, notwithstanding that the price of the raw material—cotton—advanced in the interval $\frac{1}{8}$ cent per pound, middling uplands here in New York being quoted at 8 cents on November 30 against $7\frac{7}{8}$ cents November 1st. The cotton goods trade, however, was almost alone in displaying unfavorable symptoms. Industrial affairs generally gave evidence of continued activity and prosperity, and the iron and steel trades were positively buoyant. A development of the month indicative of the satisfactory condition of these trades was the return by J. P. Morgan & Co. to the members

of the syndicate which underwrote the plan for organizing the United States Steel Corporation of the $25,000,000 in cash (12½ per cent of the $200,000,000 subscribed) paid in when the syndicate was formed. The result of the municipal election in this city, if it cannot be said to have had a direct influence upon values, at least was an assuring fact.

The most conspicuously depressing influence, as already indicated, was the continued downward course of the price of Amalgamated Copper. This stock, which in June had sold at 130, in October had dropped to 83¼. During the whole of November the shares remained weak, and towards the close of the month there came a further severe break, the price November 30 touching 72½. The only explanation offered for the collapse was that the condition of the copper trade was unsatisfactory and that the Amalgamated Company was carrying large accumulations of the metal, for which it was unable to find a market. Reports were current that the price of copper would shortly be sharply marked down from the nominal figure of 17 cents, and at the close there were rumors that the quotation had actually been shaded 2 or 3 cents. Through it all the company maintained its policy of absolute secrecy; no information was vouchsafed as to the company's condition, the amount of its unsold stocks, or its future policy.

Despite the collapse in Amalgamated shares, the stock market at times manifested great strength and in certain groups of stocks sharp advances were established. When the Northern Pacific settlement was definitely announced, the market responded the next day (the 14th) with a general decline in prices, which appeared to occasion surprise in certain quarters. The phenomenon, however, was a not unusual one, and was due simply to extensive realizing sales by those who had been waiting to dispose of their holdings (acquired at lower figures) when the favorable news should come out. The market later regained tone, and under the activity and strength of the anthracite coal properties and the shares of the Vanderbilt companies made considerable progress towards a higher level of values. The anthracite properties were in demand on the satisfactory condition of the anthracite trade, and the Vanderbilt shares were strong on renewed talk of a merger of the various separate companies. New York Central was a leader in the rise, touching 174½ November 25 on rumors of the cutting of a "melon" or the giving of valuable "rights" to the shareholders in connection with the suggested merger arrangements. The fact that the meetings towards the close of the month of the boards of directors of several companies brought no announcement bearing on the rumored scheme proved sorely disappointing, and there was a reaction to 170 by the close on November 30. This circumstance operated with the further break in Amalgamated Copper to leave the market generally weak on November 30.

The feature of the foreign exchange market was its sustained strength and the large outflow of gold to Europe which resulted from that condition. The exports of the metal from this port were in the neighborhood of 15 million dollars, all going to Paris except about $2,000,000, which went to Germany. In explanation of this rather peculiar situation at the active season of our merchandise exports, the now familiar statement was repeated that large loans on American account were being carried in Europe, and that some of these had been called while others were being paid off as they matured. Nearly all through the month there were reports that commercial bills were not in plentiful supply, which, however, must have been due to the absorption of the bills before they could appear on the market, as our shipments of produce undoubtedly were on a large scale. The export value of cotton may have been $10 a bale less than in the same month of last year, but we sent out about 210,000 bales more, so that the net loss in values, as compared with the extraordinary total of last year, could not have been material. Moreover, the aggregate value of this single item of our merchandise exports must have been not far from $45,000,000. Our corn exports naturally were small, but here again there was an offsetting advantage in larger wheat exports. Nevertheless, as we have seen, the outflow of gold was of unusual volume, and it is quite a noteworthy fact that against most of these gold shipments no bills seemed to appear on the market; from this the inference was drawn that the metal was being forwarded in direct payment of money borrowed through exchange loans.

No disturbance in the money market resulted from the gold outflow, though full 5 per cent was frequently paid on call loans at the Stock Exchange. The large bond purchases by the Secretary of the Treasury, the payments at this point for the month aggregating $14,662,676, operated to offset the gold shipments.

NEW YORK STOCK EXCHANGE.

MONTHLY AND YEARLY RECORD.

The following tables furnish a complete record of the New York Stock Exchange transactions for the past month and the year 1900. They need no extended introduction, as they are self-explanatory. The tables embrace every security (excepting only State bonds) dealt in on the Exchange. We give bonds first, using the classification adopted in the official list. As to prices the form is our own, and we think it will be found to contain just the facts desired by our readers and to present them in the most convenient way for study and reference. All quotations in the column headed "*Prices about January 2, 1901,*" were made on that date except those in italics, which are the nearest in January, 1901. The black-faced letters in the column headed "Interest Period" indicate in each case the month when the bonds mature.

☞ *For foot notes to tables see last page of Bonds and last page of Stocks.*

Boston Stock Exchange.

MONTHLY AND YEARLY RECORD.

The railroad securities which are active on the New York Stock Exchange are omitted from this list.

☞ *In comparing New York and Boston prices, it should be noted that bond prices in New York are flat prices—that is, he price includes the accrued interest, while in Boston accrued interest must be paid in addition to price. It should also be remembered that New York stock prices are per cent while those in Boston are dollars per share.*

GENERAL QUOTATIONS

—OF—

BONDS AND STOCKS.

1. In the following twenty-seven pages of tables quotations are given for all securities listed on any Stock Exchange in the United States; also for all leading unlisted and inactive securities for which we have been able to obtain reliable prices.

2. Quotations from all Stock Exchanges are as near as possible for the *last day of November*. Of course the coupon, if there be one, maturing between the date of quotation and the date of this publication, is not deducted from the price.

3. Bond prices marked thus (§) indicate that the purchaser must pay accrued interest *in addition to the price given*. The method of quoting on the New York Stock Exchange is to quote the prices flat (that is to include the accrued interest in the price), and hence in the tables below no mark is now affixed where this method of quoting is followed.

4. Stock prices marked thus (†) are per share. All others are per cent except bank stock prices.

5. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.

6. The following abbreviations are often used, viz.; "M.," for mortgage; "g.," for gold; "g'd.," for guaranteed; "end.," for endorsed; "cons.," for consolidated; "conv.," for convertible; "s. f.," for sinking fund; "l. g.," for land grant: "op." for optional

7. The black-faced type in the letters showing the interest periods indicates in each case the *month* when the bonds mature.

☞ We no longer affix a mark to prices quoted flat, but only to those which require payment of accrued interest in addition to the price. Designating mark in this instance is (§).

† Prices per share not per cent. x Ex-dividend. ‡ Sale price.

STATE AND MUNICIPAL BONDS.

Prices marked (*) are flat prices—that is, the purchaser does not pay accrued interest in addition. *In all other cases accrued interest must be added to the price.*

The figures in the column "*to net*" indicate the basis on which the securities sell or the interest rate which the securities, if held to maturity, will net to the purchaser at the present market price.

It should be borne in mind that municipal bonds are not subject to such decided fluctuations in value as are securities which form a basis for speculation.

† Prices are per share, not per cent. ‡ Sale price. x Ex-dividend.

QUOTATIONS OF BANK AND TRUST COMPANY STOCKS.

Prices are per share, not per cent, with the exception of New York City, Brooklyn and Canadian bank stocks.
Prices marked thus (*) indicate sales.
The dagger (†) prefixed to a price indicates that the figures show the book value.
☞ Notice Change.—We now report surplus and undivided profits together (in the column designated Surplus and Profits) except where otherwise indicated.
Where names of the banks are printed in italics, fuller returns may be found in the advertising columns in the front part of the paper.
